

European Guidelines for Control and Prevention of Travel Associated Legionnaires' Disease

Produced by members of the European
Surveillance Scheme for Travel Associated
Legionnaires' Disease and the European
Working Group for Legionella Infections

EWGLINET receives funding from the European Commission. Neither the European Commission, nor any person acting on its behalf is liable for any use made of the information published here.

These guidelines have been developed by members of the European Surveillance Scheme for Travel Associated Legionnaires' Disease (EWGLINET) and the European Working Group for Legionella Infections (EWGLI) and are endorsed by the Committee for the Epidemiological Surveillance and Control of Communicable Diseases in the Community, instituted by Decision No 2119/98/EC of the European Parliament and the Council.

The following members of the European Surveillance Scheme for Travel Associated Legionnaires' Disease and the European Working Group for Legionella Infections were responsible for drafting these guidelines:

Dr Carol Joseph	UK
Dr John Lee	UK
Dr Jan van Wijngaarden	The Netherlands
Dr Vladimir Drasar	Czech Republic
Dr Maddalena Castellani Pastoris	Italy

The Working Group is grateful for all comments and contributions to these guidelines that have been received during the course of their production.

The Working Group would like to acknowledge its consultation of the UK Health and Safety Commission document L8 (Legionnaires' Disease, the Control of Legionella Bacteria in Water Systems. Approved Code of Practice and Guidance) (1) during the preparation of these European guidelines.

EWGLINET (<http://www.ewgli.org>) is supported by European Commission funding.

Contents

Executive Summary	5
Part 1	8
Legionnaires' Disease and Travel	
1. Background to the guidelines	8
2. Introduction	9
3. Legionella – natural history of the organism	9
4. What is legionnaires' disease?	10
5. Methods of transmission	10
6. Recognised potential sources of travel associated infection	10
7. Risk factors associated with infection	10
8. Risk factors associated with accommodation for travellers	11
9. Surveillance of legionnaires' disease	11
10. European surveillance of travel associated legionnaires' disease	12
11. Objectives of the European scheme	13
12. Epidemiological methods	13
13. Results 1987-2004	14
14. Related activities within EWGLI	14
Part 2	16
Definitions and Procedures for Reporting and Responding to Cases of Travel Associated Legionnaires' Disease	
15. Responsibility of government nominated surveillance collaborators	16
16. Definitions for reporting	16
17. Reporting procedures	17
18. Procedures for clusters	17
19. Risk assessment report	18
20. Report of an additional case with date of onset two to six weeks after the first cluster alert	20
21. Report of new cluster cases within two years of environmental investigations	20
22. Follow up of clusters associated with more than one accommodation site	20
23. The role of tour operators in relation to reports of travel associated legionnaires' disease	20
24. Responding to information requests from lawyers and other individuals	21
References Parts 1-2	22
Figure 1 Flowchart for follow up of single cases and clusters	24
Appendix 1 – Microbiological case definitions	25
Appendix 2 – Legionnaires' Disease:- Minimising the Risk Checklist for Hotels and other Accommodation Sites	27
Appendix 3 – Form A Two Week Post-Cluster Report	30
Appendix 4 -Form B Six Week Post-Cluster Report	31
Part 3	32
Procedures for the Risk Assessment, Environmental Investigation and Control and Prevention of Legionella in Water Systems	
25. Introduction	32
26. Scope	32
27. Identification and assessment of the risk	33
28. Carrying out a risk assessment	34
29. Managing the risk: management responsibilities, training and competence	35
30. Competence	36
31. Implementation of the control scheme	36
32. Preventing or controlling the risk from exposure to legionella bacteria	37

33. Review of control measures – monitoring and routine inspection	38
34. External audit	39
35. Record keeping	39
36. Responsibilities of manufacturers, suppliers and installers	39
Part 4	41
Methods for the Investigation and Control of an Outbreak of Legionnaires' Disease in an Hotel or other Accommodation Site	
37. Sampling	41
38. Sampling the hotel's water systems	41
39. How to sample	42
40. Sample transport and laboratory processing	43
41. Emergency action	43
42. Long term remedial measures	44
Part 5	45
Glossary	
Supplement 1 Part A	49
Technical Guidelines for the Control and Prevention of Legionella in Water Systems	
1.A1 Hot and cold water systems	49
1.A2 Design and construction	59
1.A3 Management of hot and cold water systems	52
1.A4 Operation	52
1.A5 Biocide treatments	57
1.A6 General monitoring	57
1.A7 Cleaning and disinfection	60
1.A8 Cooling systems	60
1.A9 Cooling towers	61
1.A10 Evaporative condensers	61
1.A11 Air Conditioning systems	61
1.A12 Design and construction	62
1.A13 Management of cooling towers	62
1.A14 Commissioning	62
1.A15 Operation	62
1.A16 Maintenance	63
1.A17 Treatment programmes	63
1.A18 Microbiological activity	63
1.A19 Monitoring	64
1.A20 Cleaning and disinfection	66
1.A21 Other risk systems	69
1.A22 Protection of personnel	70
Supplement 1 Part B	73
Treatment Methods	
1.B1 Cooling systems	73
1.B2 Hot water systems	75
1.B3 Cold water systems	78
1.B4 Spa pools	78
Supplement 1 Part C	79
